🥫 CYLINDER ACTIVITIES

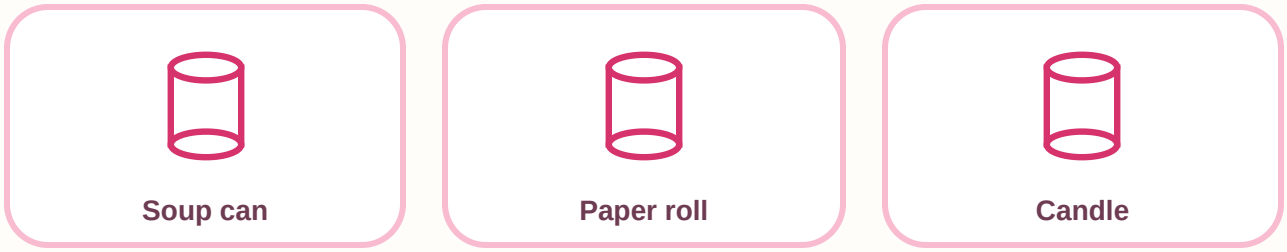

# All About Cylinders!

Two circles + one curvy side.

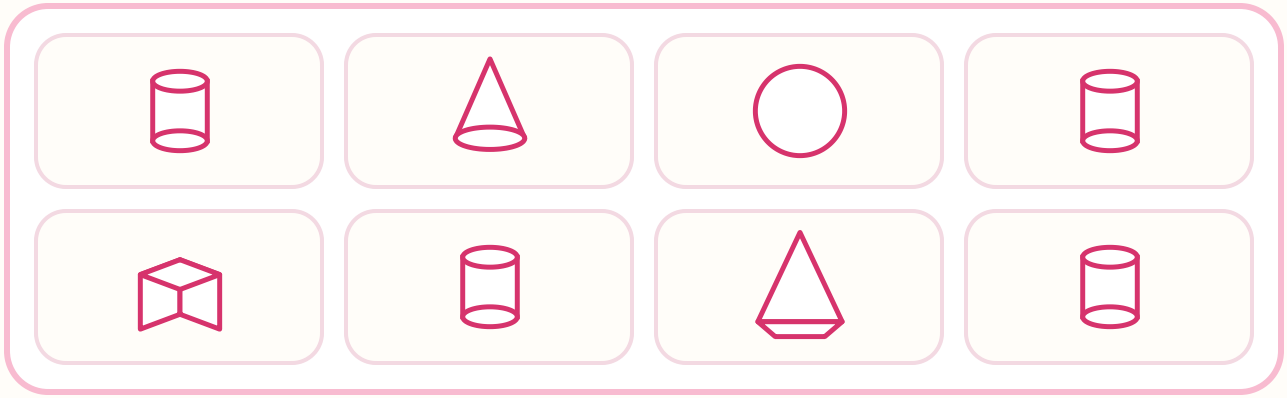

🥫 Color the cylinders! A cylinder has two flat circle ends and one curved side — it rolls on its side but stands on its ends!

👩‍👧 Parent tip: Grab a soup can for this one. Let your child feel the two flat circle ends and roll it on its curvy side — touch teaches what pictures cannot.

## 🎨 Color the cylinders!

## 🔍 Find & circle all the cylinders!
