Slime Recipe Cards

Sheet 2 of 2 - adults pour the activator!

Butter Slime

INGREDIENTS

- 1/2 cup white PVA glue
- 1/2 teaspoon baking soda
- 1 tablespoon contact lens solution, added slowly
- 85 g (about 3 oz) soft air-dry modeling clay
- 1 teaspoon unscented lotion (optional, for stretch)
- Food colouring (a few drops, optional - yellow is the classic)

STEPS

1. Stir glue, baking soda and colouring.
2. ADULT: Stir in contact solution slowly.
3. Knead 2-3 minutes.
4. Flatten, fold in clay a bit at a time.
5. Stiff? Knead in the lotion.

Store airtight - about 2 weeks.

Cornstarch Slime

INGREDIENTS

- 1/2 cup white PVA glue
- 1/4 cup water
- 3/4 to 1 cup cornstarch, added gradually
- Food colouring (a few drops)

STEPS

1. Stir glue, water and colouring.
2. Add cornstarch 1/4 cup at a time.
3. Knead 2-3 minutes until matte and moldable.
4. Sticky? Add cornstarch 1 tsp at a time.
5. Crumbly? Add water 1 tsp at a time.

Store airtight - about 1 week.

Contact Solution Slime

INGREDIENTS

- 1/2 cup white PVA glue
- 1/4 cup water (optional - for a stretchier slime)
- 1/2 teaspoon baking soda
- 1 tablespoon contact lens solution, added slowly
- Food colouring (a few drops, optional)

STEPS

1. Stir glue, water, colouring and baking soda.
2. ADULT: Add contact solution slowly, stirring well.
3. Knead a full 5 minutes before judging it.
4. Still sticky? Add solution 1 tsp at a time.

Store airtight - about 2-4 weeks.
